Re: Board of Electricity, Electrical Supplier In Rural Area

I am interested in applying to the open position for "Electrical Supplier In Rural Area" on the State of Minnesota Board of Electricity.

I am a current Board of Electricity member who works for Great River Energy, a Minnesota not-for-profit generation and transmission co-operative that supplies electricity to 28 member suburban and rural electric cooperatives. My main responsibilities include engineering and project management support for our Minnesota based generating facilities. My experience prior to this position included electrical substation design for a large consulting firm and field engineering support for a renewable construction firm based in Minnesota.

As a licensed professional engineer in Minnesota and representative of a rural electric cooperative, I feel I would be a meaningful addition to the Board of Electricity. I've had the privilege of working in both office and field environments and welcome the continued opportunity to share and learn from others in the industry.

If there are any questions or comments you might have, please feel free to contact me (763) 445-5812.

Sincerely,

A handwritten signature in black ink that reads 'Cole Funseth'.
